PROFILE

I am a creative full-stack web engineer and web3 developer with 2 years of experience building high-impact web solutions in frontend development and also the creation of various blockchain architectures and smart contracts. I am skilled in designing and developing scalable web-based applications, incorporating a range of technologies. I stay updated about the best and most relevant technologies and tools to use.

SKILLS

Programming Languages: Javascript, Python

Technologies: HTML, CSS, Bootstrap CSS, ReactJS, nodeJS, GraphQL, jQuery, expressJS, Ejs, & Moralis.

Tools: Git, Github, VSCode, Postman, Flask, Heroku & Netlify.

Interests: Web3 & Back-end development.

EXPERIENCE

Team Decentralized Financing, Blockchain Development & Smart Contracts

September 2021 - PRESENT

- I'm currently working individually and with this team to build a solid blockchain architecture using python.
- Language and tools used: Python, Flask, and Postman.

The Academia Headstart, Web Specialist - *Intern*

September 2021 - February 2021

- Joined a learning community to learn and build out modern web features using and paying attention to the best practices
- Technologies used: HTML5, Javascript, CSS3, Bootstrap
- I started learning jQuery while on the job.

PROJECTS

Team De-Fi - *August 28 (2022)*

A fully functional website for a cryptocurrency brand. In Build:

- ReactJS
- NodeJs
- MongoDB
- Moralis

<https://vocal-bublanina-e1e90d.netlify.app/>

Blockchain-Dev - *June 30 (2022)*

Building of a blockchain using the POW consensus mechanism alongside its protocol (cryptocurrency) & smart contracts. In Build:

- Python
- Postman
- Flask

<https://github.com/TEE2DWHY/Blockchain-Dev>

PhantomWallet-Auth - *August 28 (2022)*

Web3 authentication standard on the Solana Network to cache users to database and manage other on-chain features of users. In Build:

- Html
- Bootstrap
- Css
- VanillaJS

<https://tee2dwhy.github.io/PhatomWallet-AUTH/>

Web3-Auth - *August 28 (2022)*

Web3 Authentication via wallet-connect on Eth and Bsc Network using Vanilla Js. In Build:

- Html
- Bootstrap
- Css
- VanillaJS

<https://tee2dwhy.github.io/Web3-Auth/>

Life in Weeks (Hosted on Heroku server) - *July 28 (2022)*

Built to showcase how much time people have here on earth. In Build:

- Html

-
- Bootstrap
 - Css
 - Nodejs
 - Expressjs
 - Ejs

<https://polar-dawn-41842.herokuapp.com/>

Mail Sign-Up page - *july 28 (2022)*

A mail sign up page built using mailchimp API. In Build:

- Html
- Bootstrap
- Css
- Nodejs
- Expressjs
- Body-parser

<https://peaceful-headland-29946.herokuapp.com/>

Dice Game *July 19 (2022)*

A web dice game wherein the player with the highest figure wins! In Build:

- HTML
- CSS
- Vanilla js

<https://github.com/TEE2DWHY/loveCalc>

Love Calculator *14 July (2022)*

In Build:

- HTML
- CSS
- Bootstrap
- Vanilla js

<https://github.com/TEE2DWHY/loveCalc>
